

BD Plastipak™ syringe is a precision drug delivery device* that is an essential part of your daily patient care toolkit, which you can use across a range of critical applications and departments.

It is intended for general purpose injection and aspiration of fluids from vials, ampoules and parts of the body below the surface of the skin.

3-Piece Design with Latex-Free Stopper

Latex-free stopper prevents leakage of medication around the plunger and acts as an indicator for measuring the syringe contents.
